DETAILED ACTION

Applicant's election without traverse of Fig. 4 species with readable claims 1, 2, 5, 7-10, 13 and 18 in the reply filed on 12-20-2006 is acknowledged.

Upon careful review of the elected claims, it is determined that claim 9 does not read on the elected Fig. 4 species because the subject matter as recited in claim 9 only appears in the non-elected Fig. 1 and Fig. 5 species. Accordingly, claim 9 is withdrawn from further consideration as being directed to a non-elected species.

The disclosure is objected to because of the following informalities:

The specification does not provide subtitles for the various sections it contains.

Appropriate correction is required.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.

Art Unit: 2854

- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Balch(US 1,459,710).

The patent to Balch teaches the structure of a watch as claimed including a civil time display means e, g and i, solar time display means d, f, and h, and means of correction, as described in lines 54-82 on page 3, of the display means, characterized in that the means of correction are arranged in such a way as to allow a relative manual desynchronization of the civil time and solar time display means, and in that it further comprises means for displaying the desynchronization. See Fig. 1 of Balch for the display of the two different time displays and the use of a second dial i for displaying the desynchronization of the civil time and solar time. With respect to claim 2, the solar time display means comprises a solar time hand f performing one revolution in twenty-four hours. With respect to claim 8, Balch teaches in Figs. 2-7 the means of correction of the equation of time as recited.

Claims 5, 7, 10, 13 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is an Examiner's statement indicating allowable subject matter:

With respect to claim 5, the particular structural requirement of the civil time display means and the solar time display means with their relative placement in combination with the rest of the watch structure as claimed is not taught nor suggested by the prior art of record.

With respect to claim 7, the particular structural requirement of the solar time hand as defined in combination with the rest of the watch structure as claimed is not taught nor suggested by the prior art of record.
